

MICROS Hardware Solutions

**Fast. Durable. Mobile.
Hardware Solutions**

MICROS brings you industry-proven workstations, mobile tablets, and handheld solutions to power your hospitality and retail environments. Designed and developed with sustainability in mind, MICROS delivers innovative solutions to enhance mobility, expand versatility, and provide seamless connectivity.

Furthermore, several of MICROS's hardware options require less than half of the energy of typical PC based devices, cutting your power costs by 50%! Regardless of the type of environment you are in, MICROS has a point-of-sale hardware solution for you.

Workstation

Tablet

Handheld

Benefit from:

- Lower total cost of ownership
- Creating revenue-generating opportunities
- Protected investments
- Enhanced service quality and speed

Built to Fit Your Every Need

It is important to have a POS hardware solution with key features that suit your every need. The characteristics of MICROS's hardware offerings include mobility with a slim footprint, durability, power, and the convenience of deploying on the fly. Provide faster speed-of-service, improve order accuracy, and deliver outstanding hospitality wherever your guests are with MICROS hardware solutions.

Unparalleled Mobility with the mTablet Family of Mobile Devices:

Deliver exceptional service to your customers virtually anywhere. Use the slim MICROS mTablet R-Series on its own for full mobility or connect the mStation stand for the same connective utility of a workstation. Unlike consumer devices, the mTablet R-Series screen is easily viewed in direct sunlight and has been designed to better withstand damage from common falls. With the mTablet R-Series, be mobile without giving up required functionality.

environment, the WS5A and PCWS 2015 can operate side by side retaining similar styling and compatibility. Both are easy to install, reliable, unobtrusive, highly configurable and ready for use in a wide range of applications and hospitality environments.

Practical Convenience in a Handheld POS:

Are you serving hotel guests poolside, stadium fans in-seat, or guests on the golf course or casino floor? The MICROS handheld gives you and your staff the ultimate convenience to provide excellent and immediate service. The handheld device excels in fast paced hospitality environments where quick service with a personal touch is essential. This sleek yet robust solution puts a wealth of profit building power right in your hands. Take your point-of-service terminal directly to your customer and streamline the ordering process.

The mTablet E-Series line of tablets blends affordable hardware and extended battery life with all of the enterprise-grade capabilities provided by MICROS software.

This sleek yet durable solution comes in two convenient sizes: an 8" handheld version designed with on-the-go staff in mind, and an 11" version that is both fully mobile and fully compatible with the MICROS mStation base for the added flexibility of a workstation option with full peripheral connectivity.

Durability & Power in a Workstation:

Operate your business with the processing power, dependability and ease of use of MICROS Workstations. MICROS Workstation 5A (WS5A) and MICROS PC Workstation 2015 (PCWS 2015) both offer outstanding processing capability, expansion support, and peripheral connectivity. Designed specifically for the hospitality

Profit From:

- Improved speed of service to enhance revenue generating opportunities
- Flexible options that allow your staff to focus on your customers
- Mix and match MICROS Hardware solutions to meet your every demand
