Make Better Business Decisions
Using Actionable, Real-time Information

Mobile applications engage us in content that simplifies everyday activities and enhances daily life. Why not manage your business' operations using the same technological benefits? MICROS inMotion is a native mobile application that provides real-time data of daily business operations such as sales, labor, discounts, tenders, guest count, and more.

Designed specifically for restaurant operations and management, MICROS inMotion empowers restaurant operators with tools to understand both high-level trends and front-line operations using their smartphone. They can then easily and intuitively explore and act on restaurant and hospitality Key Performance Indicators (KPIs) wherever they may be.

MICROS inMotion is a full-featured, stunningly beautiful mobile companion to mymicros.net that provides revenue center details and alerts in the user's defined language.

Real Time & Actionable:

- Sales

- Labor

- Trends

- Operational Statistics

- Kitchen Performance

- Forecasts Against Performance

# Improve managerial productivity and add value to your business operations in real time.

MICROS inMotion empowers you and your business with comprehensive control of real-time data and KPIs. MICROS inMotion allows real-time access to performance statistics, critical labor details that can help control costs, and customer service tools, all supported by an intuitive user design and an alerting mechanism for operation-critical metrics.
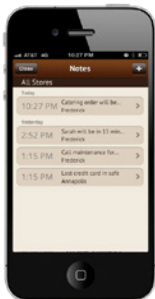

Plan Your Day

Preview and review real-time forecasts and trends. Capture the day's progress for easy business strategizing.

Enhance the Guest Experience

Perform a check look-up and email guests their checks from within the app.
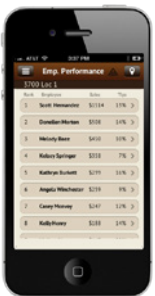

Communicate Effectively

Communication between managers is instant and easy while utilizing notes. Stay organized; notes keep managers at all locations in sync.

Be Aware

Manage your business from afar. An exception-based alerting system notifies users with relevant information when specified thresholds are exceeded.

Measure and Reward Performance

Compare performance rankings among employees and by store locale to provide reward and competition opportunities. Apprehend average KDS ticket times for speed of service control in your kitchen.

Profit From:

- Access to real-time data from anywhere on your mobile device
- Comprehensive sales, labor, discounts, tenders, and check details in user's defined language
- Simplified and instant communication between operations personnel
- Revenue center details and alerts that promote fast response times to potential problems
