

MICROS mTablet E-Series

MICROS mTablet E-Series with the new Engagement Feature

MICROS is taking advantage of recent trends in technology such as the “Consumerization of IT”, to introduce an ultra-modern mobile solution that blends the best of a rich user experience, lower-cost tablet devices with extended battery life, and all of the enterprise-grade capabilities provided by MICROS software. Through a world-class collaboration with Microsoft and Intel, the new MICROS mTablet E-Series with the new Engagement Feature provides a new set of visually stimulating app experiences and advanced capabilities that will significantly raise the bar on what a modern point-of-sale system should be.

MICROS Symphony running on Windows 8.1 Embedded Industry, coupled with the new MICROS mTablet E-Series brings a fluid, beautiful touch experience to hospitality operators around the world. The solution offers a highly customizable experience allowing any staff member to perform multiple activities from one device. Transform your business with new revenue models, new ways of communicating with customers, and new ways of inspiring employees.

Increase efficiency and productivity, and enhance operations while controlling costs.

A New way of Interacting

- Highly animated, interactive and configurable.
- Consistent experience across devices.
- Increased productivity and superior experiences for employees and customers.

The “Welcome Experience”

- Replace traditional login screens that are visible to the customer with engaging content.
- Go mobile for clienteling, to show specials of the day, upcoming customer events, and of course, to take orders.

The “Manager’s Hub”

- Access sensitive data, analytics and tools.
- Manage restaurant wait lists and reservations.
- Track and manage such metrics as sales and costs, inventory orders and receiving, and labor utilization.

The Technology

- Available in an 8" handheld version designed with on-the-go staff in mind, and an 11" version that is both fully mobile and fully compatible with the MICROS mStation base.
- Optional sleeve for both devices can facilitate payment.
- Newest technologies in a multi-use and sleek form factor, give you all-day performance, and a reliable tablet device from a name you can trust.
- Integration of the latest from Windows 8.1 featuring a modern look and feel with Live Tiles.
- Employing the latest Windows Embedded lockdown features help ensure stable operation for the long term.
- Microsoft Windows Embedded 8.1 Industry allows the longest supported life cycle of any Microsoft operating system.
- Combining the tablet with the MICROS mStation permits operators to connect the peripheral devices that the industry has come to rely upon, such as cash drawers, barcode scanners, scales and customer-facing displays.
